SUMMARY

Results-driven Frontend Developer with 2.4 years of experience in building scalable and high-performance web applications using React.js, JavaScript, and modern UI frameworks. Adept at creating intuitive user interfaces, optimizing application performance, and implementing authentication solutions. Experience working on AI-driven projects, encryption-based security features, and large-scale UI implementations. Some exposure to backend technologies and cloud platforms. Seeking opportunities to contribute technical expertise and innovation to a dynamic team.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Redux, React Query, TypeScript, Ant Design, Tailwind CSS, Performance Optimization, Authentication, Data Fetching
- **Backend:** Node.js, Express.js, Python (Basic), MongoDB, MySQL
- **Tools & DevOps:** Version Control (Git, GitHub/GitLab), CI/CD, Jenkins, npm, GCP, Netlify

PROFESSIONAL EXPERIENCE

Netenrich Inc.

Frontend Developer | [Dec 2022] – Present

- Led the development of multiple UI screens, ensuring responsiveness and optimal performance.
- Designed and implemented account onboarding workflows, improving user experience and reducing onboarding time.
- Developed LED implementation for a Malware Extraction feature, integrating encryption and decryption logic.
- Contributed to LLM-based projects, creating and deploying AI-driven agents for automation.
- Spearheaded the Dark Mode implementation across the portal, ensuring consistency and accessibility.
- Collaborated closely with designers, backend developers, and product managers to deliver high-quality features.
- Optimized application performance, improving loading times and overall efficiency.

PROJECTS & CONTRIBUTIONS

- **Malware Extraction Feature:** Designed an encryption-decryption logic to enhance security.
- **LLM Agent Deployment:** Worked on integrating AI models and deploying them for real-world applications.
- **Dark Mode Implementation:** Led and successfully implemented dark mode across the entire platform.
- **Account Onboarding:** Built a seamless onboarding flow, improving user engagement.

EDUCATION

PG-DAC - Centre for Development of Advance Computing

Mar 2022 - Oct 2022

SOFT SKILLS

- Problem-Solving & Debugging
- Team Collaboration & Communication
- Agile & Scrum Methodologies
- Leadership & Ownership
